Abstract (en)
[origin: WO2007132006A1] Patient-related data management method within the scope of an evaluation operation conducted in at least one treatment centre (100), characterised in that it comprises the steps consisting of the input of data relating to a patient using at least one input terminal (112) to form a patient record, the validation of said input using a patient application (115), the automatic processing of the patient record by the patient application (115) to form a source record which complies with one or more regulatory requirements, the registration of the source record in a source database (10) deployed in the treatment centre (100) taking part in the evaluation operation, the comparison of the source record data with enrolment criteria provided by the sponsor of the evaluation operation, the pre-enrolment of the source record whereby, in particular, the source record is duplicated automatically to form a potential evaluation record, the registration of the potential evaluation record in a local evaluation database (20) deployed in the treatment centre (100), the enrolment of the potential evaluation record using a local evaluation application (121), the validation of this enrolment step resulting in the export of the data from the potential evaluation record to form a CRF evaluation record in compliance with the sponsor's requirements, the registration of the CRF evaluation record in a database (10) deployed in the treatment centre (100).
