Abstract (en)

[origin: WO2007136725A2] A game system is for playing an electronic game. The game system comprises a player game device for allowing a player to place a wager and a game controller coupled to the player game device. The game controller is for playing the electronic game and establishing an outcome of the electronic game. The outcome of the electronic game includes a payout according to a first payable. The game controller is also for displaying a plurality of values on the player game device which are associated with the payout from the first payable. A result of a mathematical function applied to the values is equal to the payout.
