Abstract (en)
A machine for working door and window component parts (2) of wood or similar has a bed (3) extending in a first direction (4); cross members (16) mounted on the bed (3) and parallel to a second direction (9) crosswise to the first direction (4); at least one clamping device (17) fitted to each cross member (16) to clamp at least one component part (2); a bridge crane (6) movable along the bed (3) in the first direction (4); and two machining units (12, 29) movable along the bridge crane (6) in the second direction (9); one (29) of the machining units being designed to detach a bead (43) from the component part (2) and fasten the bead (43) to the same component part (2).
