Abstract (en)
[origin: EP2025528A2] The binder has an adhesive coating system including a contact spray valve for applying an adhesive from a book block upper surface in a region of a base section (32) and/or header section (31) of book blocks (10). Another contact spray valve applies an adhesive on a wrapper, and the adhesive coating system is arranged between a folding station and contact pressure station. The contact spray valves of the adhesive coating system are arranged at a region of a wrapper feeder, where the latter contact spray valve of the adhesive coating system is deemed for the folding station. An independent claim is also included for a method for producing a book and brochure.
