Abstract (en)

Described is a hermetically sealable container (1) to hold and display perishable products, in particular fresh food products, comprising a tub (2) and a sealing barrier (3) which may be reciprocally heat sealed to define a cavity (4) to hold the product closed and isolated from the surrounding environment; the tub (2) has a top edge (5) and comprises a wall (6) surrounding the containment cavity (4), which has a first stratiform element (7) made of cellulose material coated on both sides by layers (8) of film material; the container (1) also comprises a tuck (9) located on the surrounding wall (6) in a remote location to it, which may be bent back onto itself to cover at least partially the top edge (5) of the tub (2); the tuck (9) being heat sealable directly to the sealing barrier (3).
