Abstract (en)
A slide bar (9) extending in a weaving-width direction is supported by a plurality of support bases (7). A movable body (8) movably provided at each of the support bases (7) is received by four turning wheels (14a, 14b, 14c, 14d) provided in a front-rear direction of warps (3) and in a weaving-width direction so as to roll and move with the four turning wheels (14a, 14b, 14c, 14d). A regulation unit for regulating shifting in a weft direction is provided between the movable body (8) which is integrally provided with the slide bar (9), and a guide base (19).
