Abstract (en)

[origin: CN101368319A] The invention relates to a transport unit (17) for transporting sewing materials while operating a sewing machine comprising at least a transport section (28, 28a) which is configured to frictionally cooperate with sewing materials and implement a transport motion in a needle plate recess of the needle plate; and a basic body (29) through which the transport section (28, 28a) is connected to a transport unit bracket. An edge contour (32) of the transport section (28, 28a) verges into an edge contour (33) of a basic body seen with mounted feeder 17 in a projection on a needle plate-planar.
