Abstract (en)

Sliding door (10) for a fixed structure (13) provided with at least one opening (14). In the fixed structure (13) two panels (11) are foreseen that can slide between a first open position and a second closed position of the opening (14). Each of the panels (11) is provided with at least one sliding and guide element (22a,22b). The sliding and guide elements (22a,22b) are forced to slide inside rails (23,24) consisting of a first linear portion (23a,24a) parallel to the main extension of the fixed structure (13) and a second curved portion (23b,24b).
