Abstract (en)

The system (10) has a cooler (12) with a housing (24) and a valve that comprises a rotatably operated valve element on an inflow side (20). An actuator (14) for the valve is attached to the cooler housing, and is connected with the valve by a lever (30) and connecting element i.e. coupling bar (32). A ball joint is provided between the lever and the connecting element, and the valve element is eccentrically provided with respect to a rotation axis in a direction. The valve element locks a valve seat around an entire circumference of the seat.

Abstract (de)

Ein Abgasrückführsystem (10) mit zumindest einem Kühler (12) mit einem Gehäuse (24) und zumindest einem Ventil (50) mit einem schwenkend betätigten Ventilelement auf einer Zuströmseite (20) zeichnet sich dadurch aus, dass ein Aktuator (14) für das Ventil an dem Kühlergehäuse (24) angebracht ist.
