Abstract (en)

[origin: EP2026416A2] The cable receiving device (2) has an insert opening section (6) which is so formed that a partial region of end area of a cable (3) is introduced in the interior of cable receiving device. An electrical contact element is provided separately from the electric conductor of the cable. A resettable holding element (11) is so formed a shoulder (8) of a reinforcement element is form-fit with the projections (7) after the introduction of laminar end area of the cable. An independent claim is included for a contact system.
