Abstract (en)

[origin: EP2026418A2] The muffler has an embedded component (2) with an electromechanical or electronic component, and a connecting plug fixed with an external connection, and enclosing a free contact end (14) of an electrical conductor (16). The conductor is aligned outwards from the component (2) to the connecting plug by a side wall. The conductor is surrounded by a plastic material of a fixing body (19) in an area that runs from the electronic component up to the contact end, where the fixing body is fixedly embedded by the muffler in a form-fit manner.
