Abstract (en)

[origin: DE102006056656A1] The switch module (10), has a metallic housing (11), which has a cylindrical base body (12) with a longitudinal axis and a right angled outlet (13) that sticks out from the base body. The housing has another outlet (14) and each of the two outlets are fluid-tight connected with insulated bushings (18,19). A metallic contact piece (20,21) is accommodated in each of the two bushings in a fluid-tight manner. The contact pieces are connected by a position switch and the circuit breaker accessible from outside, which are provided with a bar (25) for actuation.
