Abstract (en)  
[origin: WO2007131678A1] The present invention relates to novel active substance combinations which consist of at least three fungicidal components A, B and C. A, B and C may be selected among the following compounds: A) the compounds of the general formula (I), where the radicals R<sup>1</sup> and R<sup>2</sup> have the meanings given in the description, B) azoxystrobin (II), fludioxonil (EI), C) a triazole of the general formula (IV), or triazoxide (V), silthiofam (VI), penthiopyrad (VIT). The active substance combinations are highly suitable for controlling undesirable phytopathogenic fungi. In particular, the active substance combinations according to the invention are suitable for the treatment of seed.
