Abstract (en)

[origin: WO2007128926A1] This invention concerns a biocompatible paste containing an aqueous excipient, which can be used to form a bandage by application of said paste on mucous membranes of the oral cavity or on the skin, characterised in that it contains the following essential ingredients: natural kaolin containing at least 80%, and preferably at least 95%, by mass of kaolinite; a humectant chosen from the group containing propylene glycol, glycerol, polyethylene glycol, sorbitol and any mixture thereof; and a hydrogel forming agent, forming a hydrogel with a portion of the water contained in said excipients, chosen from the group containing anhydrous colloidal silica, cellulose, carboxymethyl cellulose, guar gum, xanthan gum and any mixture thereof. It also concerns the use of this paste as a bandage, notably as a hemostatic bandage, particularly for stopping bleeding of mucous membranes of the oral cavity.
