Abstract (en)

[origin: GB2432578A] A cushion pack 1 features a fibreboard lattice 3, such as in a concertina form, within a vented 5 polymeric envelope 2. Also disclosed is a corresponding method of making the cushion pack 1 by enclosing the lattice 3 within the envelope 2. The item may find application in the field of buffering consumer goods packaged in boxes from and shock or impact. The concertina form lattice 3 may flex, and air may be expelled from the pack via the vents 5 during any impact, to attenuate the forces involved.
