Abstract (en)  
[origin: WO2007135031A1] The invention relates to a method for the continuous production of ethylene copolymers by radical copolymerization of ethylene and at least one comonomer (b), selected from the group including ethylenically unsaturated carboxylic acids, esters of ethylenically unsaturated carboxylic acids, ethylenically unsaturated phosphonic acids and esters of ethylenically unsaturated phosphonic acids. The method according to the invention is characterized by metering, separately from ethylene and the one or more comonomers (b), one or more inhibitors to the reaction mixture.
