Abstract (en)

[origin: WO2007143768A1] In a device for injecting fuel into the combustion chamber of an internal combustion engine comprising at least one high-pressure accumulator (1), an injector (4), at least one high-pressure line (7) connecting the high-pressure accumulator (1) and the injector (4), and a resonator line (16) connected parallel to the high-pressure line (7) between the injector (4) and the high-pressure accumulator (1), which has a resonator choke (17) on the high-pressure accumulator side, the resonator line (16) is formed by an insert (18) which is pressed into the high-pressure line hole and is particularly designed in this insert.
