Abstract (en)

[origin: WO2007144277A1] The invention relates in particular to a solid-state actuator drive apparatus comprising a solid-state actuator drive apparatus control device having a first connection (13) for driving a first solid-state actuator (1), a second connection (14) for driving a further solid-state actuator (1\*) and a control circuit (10) for charging and discharging the solid-state actuators (1, 1\*) in such a way that the latter drive a shaft (4) mounted in a circular drive body opening (5) of a drive body (3), wherein the control circuit (10) is connected and/or driven for the charge transfer of charge (Q) from the first solid-state actuator (1) into the further solid-state actuator (1\*) during the charging of the further solid-state actuator (1\*).
