Abstract (en)

[origin: WO2007145623A1] A method, system and central monitoring station is provided for visual verification of an alarm system event in which image data corresponding to a plurality of images associated with the event is transmitted. The image data corresponding to the plurality of images is processed to create one or more processed images in which the one or more processed images are arranged to allow an operator to visually observe changes in the plurality of images. The one or more processed images are displayed.
