Abstract (en)  
The cleaning device has a device housing (10), a chassis (12), and a tube device comprising a spiral coiled tube (36) for elastic deformation, where the tube (36) is formed as a high-pressure tube. The chassis has rolling bodies (14, 16, 18), which are formed for clamping a device-supporting surface. One of the rolling bodies is laterally projected over a device base contour of the device housing. The chassis is formed by a stand. One of the rolling bodies is pivotably supported around a steering rotation axis (24). The stand is formed by a unit separated from the housing.

Abstract (de)  
Die Erfindung beschreibt ein Hochdruckreinigungsgerät mit einer Schlauchvorrichtung, welche einen Spiralschlauch (36) aufweist.
