Abstract (en)  
[origin: EP2027994A2] The device has an embossing unit (2) comprising embossing rollers (3, 4, 5) with embossing structures (7) for pressing of a packing film and/or an embossing structure (8) for producing of an authentication object and/or logos on the packing film. Control units of embossing units are synchronized with a process cycle of a packing system. One of the control units makes the synchronization of a working cycle of one of the embossing units with a working cycle of the embossing unit (2). Another embossing unit of control units has folding rollers for attaching folding breaklines on the packing film. An independent claim is also included for a method for arranging packing films in a packing process.
