Abstract (en)
[origin: EP2028153A1] The winch (1) has a drum pivot bearing (20) in which a cylindrical drum (10) is rotatably supported around a rotation axis. The pivot bearing is pivotably supported around a pivoting axis (43) by a pivoting joint (40) in a supporting device (50). An actuating drive (30) is provided for active pivoting of the drum around the pivoting axis. The pivoting axis runs within the drum, and is aligned transverse to the rotation axis. The actuating drive is partially arranged within the drum. The drive has a hydraulic cylinder.
