Abstract (en)
[origin: CN101344768A] This invention is related to a spinner (1), especially the spinner (1) or winding machine with a machine control device (12) for production control and production monitoring of the spinner (1), including multiple sections (2a-2d) with same type. Each section (2a-2d) comprises section control devices (30a-3d). The section control device is connected with the machine control device (12) for communication and is connected with multiple working points (3a-3q) with same type installed at sections (2a-2d). And working points (3a-3q) of one section (2a) can be assembled to a set, wherein each set (34a-34d) is provided with a set control device (35a-35d) and is connected with each section control device (30a) through working points (3a-3d, 3e-3h, 3i-3l, 3m-3p) of each section (34a-34d).
