Abstract (en)

[origin: EP2028307A1] The unidirectional thread application process is for laying threads on two longitudinal conveyors spaced out from each other, with fixing hooks (3, 4) for the endless thread supplied by feeders for laying in a unidirectional layer. There is a feeder (10, 11) for each conveyor (1, 2), moving two-dimensionally in movement plane running in laying plane.
