Abstract (en)

[origin: EP2028336A1] Set of fittings and profiles for building a bearing structure for closet doors and alike, comprising two frames (2-2') that can be folded together through a hinge (3), having the first frame (2) vertical profiles (4) and horizontal profiles (5), and the second frame, vertical profiles (4') and horizontal profiles (5'). The set has sliding elements (7) on the vertexes (6) of the first frame (2) furthest away from the joint area between both frames, pivot elements (8) on the vertexes (6') of the second frame (2'), opposing the vertexes (6) of the structure, angle bracket fasteners (10) on the rest of the vertexes (9-9') of the first (2) and second (2') frames and a series of fixing braces (17-17') on each one of the frames (2-2'), that join together the vertical profiles (4) and (4') of each frame and are parallel to the corresponding horizontal profiles (5) and (5') in each case.
