Abstract (en)  
[origin: DE102007040047B3] The electrical switch has a housing (1). A plastic deformation element (6) is provided on the actuator (3) for damping the excessive force effect in addition to the elastic deformation element (7). The deformation energy consumption of the deformation element is greater than the deformation energy consumption of the elastic deformation element. The elastic deformation element is impinged on the actuator during excessive force effect and impinges the plastic deformation element of the actuator.
