Abstract (en)  
[origin: WO2007140507A1] This invention relates to a plough comprising a frame and a plurality of gangs of discs pivotably coupled to the support frame for movement between a carrying position and a ploughing position. The plough includes two or more wheel assemblies for supporting the supporting frame and means for driving the gangs of discs between the carrying position and the ploughing position. The plough further includes means for linking each gang of discs to the drive means such that the gangs of discs move in unison upon actuation of the drive means.
