Abstract (en)  
[origin: WO2007134946A1] The invention relates to a collapsible rest support comprising a frame having at least four sections (1-4) hinged together about an axis (5) with which a support surface (6) is associated, two of said sections forming suspension arms (1, 2). According to the invention, two other of said sections form the legs (3, 4) of said support, each having a truncated V-shape (22), and said support surface (6) joins together said sections forming the suspension arms (1, 2) so as to at least partially cover at least on of the lateral faces (14, 15) of said collapsible support.
