Abstract (en)
[origin: WO2007147466A1] Irradiation device for technical applications, having a plurality of elongate radiators emitting in or between the UV and IR ranges and a plurality of main reflector sections which are bent and/or folded from metal sheet in a shape matched to the shape of the radiators, wherein the main reflector sections are designed as separate main reflectors and can be replaced individually and are held independently of the radiators in a radiator housing.
