Abstract (en)

[origin: WO2007141580A2] There is provided the genes for components of RNase H2, namely RNASEH2A, RNASEH2B and RNASEH2C, together with the proteins encoded thereby. Recombinant polynucleotides comprising these genes are described, optionally as vectors. Recombinant RNase H2 is also described together with an assay to assess the effect on activity of a test substance or of a modified (ie. mutated) component of the RNase H2.
