Abstract (en)

[origin: WO2007146953A2] Embodiments of methods of using siRNAs targeting VEGF including an siRNA defined by SEQ ID NO: 77 and SEQ ID NO: 78 to stabilize visual acuity in a subject, to inhibit choroidal neovascularization lesions, to treat age-related macular degeneration, to treat diabetic macular edema, and to decrease foveal thickness in subjects are disclosed. Additionally, methods of treating age-related macular degeneration and diabetic macular edema by administering combinatorial therapy comprising an siRNA targeting VEGF and a non-siRNA VEGF antagonist are described.
