Abstract (en)

[origin: WO2007141097A1] Method, computer program and device for testing a component, contained in a vehicle, of a fuel injection system, wherein the testing is carried out in the operating state of an internal combustion engine, and wherein, in the event of deviations from the values permissible for the component to be tested, a further test in a further method step is activated in order to confirm and/or localize the error.
