Abstract (en)

[origin: WO2007147830A1] The invention relates to a method for producing a three-dimensional computer model of a real town from geoinformation for the real town which is to be modelled, where three-dimensional computer models of the town's buildings are produced on the basis of a predefined set of three-dimensional building types, and also on the basis of building attributes which can be used to vary the predefined building types.
