Abstract (en)

[origin: EP2030725A1] The device (1) has a conveyer system (10) for promoting the work pieces in a process flow direction. An orientation unit (30) is provided, which has orientation elements (32,34) that are displaceable within limits of a process flow direction. The orientation unit is arranged to operate the work piece before seizing the position. An independent claim is included for a method for aligning of work pieces.
