Abstract (en)  
[origin: EP2030744A1] The device has a cutting head (3) with a cutting tool that is designed as endless circular cutting strip (4). A supply station includes a conveyor (5). A cutting head is movably supported around an axis in a machine frame (2), where the axis is arranged in a conveying plane of a conveyor and arranged parallel to conveying direction. Lump of the cutting strip runs in a free die clearance, which is limited by an end-sided deflection roller of the conveyor and by a unit of a delivery device (7). The unit is arranged parallel to the deflection roller.
