Abstract (en)

The exhaust pipe (10) has an end pipe cover (12) and a sliding section, which enables shifting of the pipe cover relative to the exhaust pipe against a defined sliding force. The sliding section is formed by deformation clips (16). The deformation clips are integrally formed with the pipe cover. The pipe cover has a fastening section, which is connected with the exhaust pipe by rivets. A ring from conductor fabric is arranged between the pipe cover and the exhaust pipe. The deformation clips are formed by openings (17) that are provided in a section of the pipe cover.

Abstract (de)

Die Erfindung betrifft ein Abgasrohr mit Endrohrblende (12), insbesondere für eine Kraftfahrzeug-Abgasanlage, mit einem Schiebeabschnitt, der eine Verschiebung der Endrohrblende (12) relativ zum Abgasrohr (10) entgegen einer definierten Schiebekraft ermöglicht.
