Abstract (en)

[origin: DE102007022931A1] Production of a metal strip (1) comprises using rolling and milling operations directly with casting of a slab (3) in a casting machine (2). The rolling operation is divided into at least two partial rolling operations in a first mill train (5) and a second mill train (6). The milling operation is carried out directly before or between the rolling operations in a milling machine (4). An independent claim is also included for a device for producing a metal strip.
