Abstract (en)
[origin: WO2007144219A1] The invention is based on a protective hood fastening device having a fastening element (12a - 12n) for fastening a protective hood (14a - 14n) which is intended for partly enclosing a rotating application tool on a body (16a - 16n) of an electric tool (10a - 10n). It is proposed that the fastening element (12a - 12n) comprise at least one latching element (18a - 18n) for locking the protective hood (14a - 14n) against rotation relative to the body (16a - 16n) of the electric tool (10a - 10n).
