Abstract (en)
[origin: WO2008000925A2] This support (10) for a series of tools (12), each tool comprising at least one head (14) and one handle (18), comprises a base (20); a plurality of housings (22), each housing being intended to receive and retain the handle (18); a plurality of means (32) for receiving and retaining a head (14), each receiving and retaining means (32) being intended to receive and retain the head (14); the housings (22) and the receiving and retaining means (32) being secured to the base (20), each housing (22) comprising two partitions (24), at least one of the partitions (24) including a means (30) for positioning the handle (18). At least one partition (24), which is formed integrally with the base (20), is designed to flex elastically and transversely to allow the handle (18) to overcome the means (30) for positioning the handle (18).
