Abstract (en)
[origin: WO2007147752A2] The invention relates to a stop device for a workpiece carrier (10) arranged on a conveyor system, said stop device comprising a stopping element (26) that can be moved into and out of a path of displacement of the workpiece carrier (10). The stop device also comprises a damping element (26) for damping the stopping process of the workpiece carrier (10). A displacing device (34, 36) connected to the damping element (26) is used to stop the workpiece carrier (10) in a pre-determined end position.
