Abstract (en)

[origin: WO2008000674A2] The invention relates to alkoxy silyl functional oligomers (A) and the hydrolysis and condensation products thereof, obtained from polymerisation of 100 parts by weight of ethylenically unsaturated alkoxy functional silane (S) together with 0 to 100 parts by weight of ethylenically unsaturated comonomers (C), core-shell particles (PA), with oligomers (A) on the surface thereof and use of said particles (PA) for producing composite materials (K).
