Abstract (en)  
[origin: WO2007128732A1] The invention relates to a refrigerated product carrier (2) for a refrigeration device (1), comprising a refrigerated product container (3) that can be pulled out by means of a telescopic slide. Said slide has a guide part (14) that can be locally fixed in relation to the refrigeration device (1) and a free rail part (15) that can be arranged on the refrigerated product container (3). According to the invention, the guide part (14) is mounted on a support element (4) that can be removably fixed to the refrigeration device (1). This automatically guarantees the precise relative positioning of the guide part (14) and the free rail part (15) and the totally flexible arrangement of the refrigerated product carrier (2) in the refrigeration device (1).
