Abstract (en)

[origin: WO2008000660A1] The invention relates inter alia to a method for producing a cast piece (100), especially a cast metal piece, comprising at least one information element (5) carrying at least one piece of information. The invention is characterized in that the information element (5) is produced from a magnetizable material (10) and the information is deposited in the magnetizable material and is cast into the information element during casting of the piece, the casting temperature being above the Curie temperature of the magnetizable material of the information element.
