Abstract (en)

The invention relates to a side module for a chair, comprising a side element (1) and at least one support element (2), which will support a seat and a back (4) and which is attached to the side element such as to pivot between a first position corresponding to a non-reclined position of the back and a second position corresponding to a reclined position of the back. The side module comprises a non-metallic elastic element (5) assembled so that it attracts the support element towards its first position. The invention also relates to a chair and to a row of chairs.
