Abstract (en)
[origin: EP2033559A2] A steam vacuum cleaner includes a suction port assembly comprising a dust receptacle formed therein, and an impeller driven by a motor to draw in air and dust from an object being cleaned through a suction port formed on a lower portion and to discharge the suctioned air and dust into the dust receptacle, a main body comprising a water tank, and a heater unit to receive water from the water tank and generate steam, a lower portion of the main body being hinged to a portion of the suction port assembly, and a floorcloth plate formed on a lower portion of the suction port assembly, and comprising at least one floorcloth attached thereto.
