Abstract (en)

A packaging unit, particularly for substantially cylindrical elements, comprising means (2) for moving a substantially cylindrical element (3) to be packaged and a dispenser (4) of film (5), which is adapted to package the element (3), the packaging unit (1) comprising at least one electrostatic field generator, which is adapted to induce a difference in electrostatic potential between the element (3) and the film (5), the difference in electrostatic potential causing the adhesion of the film (5) to the element (3).
