Abstract (en)

[origin: EP2033917A2] The method involves operating a winding coil drive with its actual power output. A storage module is provided with a conveyor belt supply reel (3). A bank note collection reel (2) is provided with actuators (9,10). The actuators are streamed simultaneously from a control unit (11). The actuators are bypassed for positioning of the conveyor belt supply reel and the bank note collection reel.
