Abstract (en)
[origin: EP2034235A1] The headlamp has a projection lighting unit (1) for generating a predetermined light distribution e.g. autobahn light distribution. The projection lighting unit includes a light source device (2) e.g. LED luminous element chip, attached to a reflector device (3) and a lens (5) pre-located in the direction of the light beam of the reflector device. The reflector device is opened in a unique direction, and extends in a region between a plane of extension of the light source device and an optical axis (7) of the lens.
