Abstract (en)

[origin: EP2034495A1] The current transformer-component (10) has current transformers (12a to 12c) with inductors (14a to 14c) with a plane surface and a conductor. Ducts (16a to 16c) for conductors (18a to 18c) are perpendicularly arranged to the plane surface of the inductor. The conductor has three sections (24a to 24c, 26a to 26c, 28a to 28c). The two sections are partially arranged parallel to the plane surface. The third section is partially guided by the duct of the current transformer. The three sections are arranged in the conductor in Z-shape. An independent claim is included for a mounting device for a current transformer-component.
