Abstract (en)
[origin: WO2007143779A1] A method for agglomeration (10) characterised by the method steps of: i) adjusting the moisture content of an ore material to be agglomerated to a predetermined level, ii) passing the ore material to an agglomeration circuit (20); and iii) adding an acid containing agglomerating solution to the ore material in the agglomeration circuit to provide an agglomerated ore material, whereby the acid concentration of the agglomerating solution does not exceed about 100g/L.
